Product Designer with over 6 years of experience in the design area and specialized in creating user-centered solutions. Focused on delivering high-performance, easy-to-use, and scalable products, I am currently working at the 3rd biggest bank company in Brazil with 2 soon-to-be-released user journeys. My work experience also includes 6 projects at Omega Energia (now Serena Energy), and other businesses such as Fusion DMS, BRZ Digital, and TRON Soluções.

Abilities

Figma, Miro, HotJar, user research, user-centered design, user journey, user interface, user flow, prototypes and prototyping, SCRUM and Kanban agile methodologies, user testing, HTML, JavaScript, CSS, wireframes, team culture, Adobe Creative Suite, Adobe XD, design systems and accessibility, empathy, good collaboration, communication, and soft skills.

WORK EXPERIENCE

QiBit/Bradesco - Senior Product Designer (January 2025 - Current)

- At Bradesco, I am responsible for developing prototypes and mobile journeys that are used by 109 million clients every day.
- I was responsible for creating and refining the credit portability journey, which permits clients to bring their contracts from other banks to Bradesco.
- Also, I created the communication strategy for overdraft facilities for 4 customer segments of the bank.
- Currently, I am focused on the real estate credit journey, where clients can amortize their debt with the bank using the app and the solution that I created.

Omega Energia/Serena Energy - Product Designer (September 2021 - January 2025)

- 1st place in the Omega Tech hackathon.
- I was directly involved in the development of six high-value applications and software for the company, collaborating with various developers, product owners, product managers, designers, and diverse teams.
- Conducted user research, workshops, and feedback sessions that guaranteed the higher quality standards of the projects.

- In collaboration with other designers, we developed a new design system and updated all products when the brand changed.
- Led the research and design development of SIGMA GD, and worked closely with a team of developers, a product owner, and a tech lead. This project is responsible for invoicing all Distributed Generation clients in the company, and right now manages more than 500.000 clients and R\$500 million every month. Also, the SIGMA team, with me as product designer, became the highest delivering team in the company.

Fusion DMS - Multimedia Designer (February 2021 - September 2021)

- Collaborated with the marketing team to increase the number of clients and improve the company's visibility through media and design content.
- Made improvements on their website to gather higher conversion rates.

BRZ Digital - Multimedia Designer (September 2020 - December 2021)

- Project management and visual identity of Minha Vitrine service, also conducted the user flow and user interface development of the product's landing page.
- I was directly involved in the media management of 3 political campaigns at the same time.

TRON Soluções - Graphic Designer and Video Editor (September 2020 - December 2021)

- Developed new graphic design and video content for international clients and also guided their website with the help of a marketing lead to be closer to their public and improve conversion rates.
